

OHIANI SAMUEL

Software Engineer • Backend and Full Stack

ohianisammy2005@gmail.com • [LinkedIn](#)

EDUCATION

B.Sc. Computer Science, Covenant University

TECHNICAL SKILLS

TypeScript, JavaScript, Python, Node.js, NestJS, Express, React, Next.js, .NET, PostgreSQL, MongoDB, Redis, Supabase, AWS, Docker, Git, Swagger and Postman

WORK EXPERIENCE

Software Engineer

December 2025 – Present

Resilience 17

Lagos, Nigeria

- Integrated five provider APIs for Nuvion: PayPal/Venmo, Checkout.com, Rapyd, Fiserv and emerchantpay; extended Worldpay with Google Pay and chargeback flows.
- Built seller onboarding and transaction flows spanning 3DS, payment intents, captures, refunds and signed webhooks.
- Standardized provider errors, strengthened timeout and retry handling, and added sandbox scenarios for QA.

Software Engineer

May 2025 – September 2026

Rivo (Low Gravity)

Lagos, Nigeria

- Built fiat and crypto wallet APIs for Rivo and Rivo Business, including deposits, swaps, transfers, KYB onboarding, payment links and team permissions.
- Fixed settlement, balance and webhook issues, including duplicate deposit notifications; reported backend-related issues fell by 40%.
- Delivered recent-recipient and refund flows and supported production deployments.

Backend Developer Intern

Mar – Aug 2024

Precise Financial Systems

- Debugged and updated .NET services in a financial software environment through guided code reviews.

Backend Developer Intern

Mar – Sep 2024

Unified Payment Services Limited

- Investigated JavaScript and Node.js payment API endpoints and applied fixes with a lead engineer.

SELECTED PROJECTS

- **Nuvion** Contributed provider integrations and payment lifecycle APIs across onboarding, 3DS, authorization, capture, refunds and webhooks.
- **Qualiflow** Built a CSV lead-scoring app with adjustable criteria, explainable rankings and safe spreadsheet exports.
- **Iraid** Built the frontend and Sanity-managed gallery workflow so the team can update images and captions without a code release.
