B.Sc. Computer Science, Covenant University.

Relevant Coursework: Software Development Life Cycle, Internet Programming, Data Structures and Algorithms.

TECHNICAL SKILLS

Node.js, Nest.js, TypeScript, JavaScript, Express.js, Python, React.js, Next.js, Tailwind CSS, HTML, CSS, Git/GitHub, Render, Heroku, Figma, PostgreSQL, MongoDB and API Documentation (Swagger/Postman), OpenAI, Claude

WORK EXPERIENCE

Backend Engineer

December 2025 - Present

Resilience 17

Lagos, Nigeria

- Integrated payment APIs for PayPal/Venmo, Checkout.com, Rapyd, Fiserv, emerchantpay, and Worldpay, supporting card acquiring and Apple Pay and Google Pay flows.
- Standardized error contracts across services and improved gateway timeout, retry, and dependency failure handling, reducing transaction failures during provider instability.
- Built and refined end-to-end card payment flows, from transaction initiation and gateway authorization to callback/webhook processing and final status updates.
- Worked with product and QA to turn payment rules into backend validations and test failure scenarios.

Backend Engineer

May 2025 – September 2026

Low Gravity Limited – Rivo Business

Lagos, Nigeria

- Built fiat and crypto wallet APIs for Rivo, Rivo Business, and Bluecole, covering deposits, swaps, transfers, recipients, payment links, and USD payouts.
- Integrated Kora for NGN pay-ins and payouts and expanded Quidax crypto wallet and network support, including webhook and transaction status flows.
- Built KYB and business onboarding workflows, team roles and permissions, transfer approvals, and transaction limits.
- Resolved settlement, balance, refund, and webhook issues; reported backend issues fell by 60%.

PROJECTS

HebronBites

March 2024

- Web-based application connecting users to campus food vendors. Users can browse menus, place orders, rate vendors, and track deliveries.
- Built with Node.js, Express, Sequelize, PostgreSQL, and Paystack.

Buga Travels

July 2024

- A school ride-hailing mobile application designed to connect users with reliable drivers for safe and convenient trips to and from their various schools.
- Developed with Node.js, Express, Sequelize and PostgreSQL.

VOLUNTEERING EXPERIENCE

Backend Developer

November 2021 – October 2025

Hebron Startup Lab

Covenant University, Nigeria

- Contributed to team-driven projects, emphasizing responsiveness and cross-platform compatibility.
- Enhanced skills in modern backend technologies, including NodeJS, TypeScript, and JavaScript, through hands-on projects and peer learning.

Member

November 2021 – October 2025

Google Developer Student Clubs

Lagos, Nigeria

- Attended workshops and coding sessions, gaining hands-on experience in backend development.
- Engaged in knowledge-sharing sessions, learning about cloud computing, machine learning, and other innovative technologies.
- Networked with fellow engineers and industry professionals, expertise in modern development practices.
